Mission

Elektor Industry offers electronics engineers, innovators, and start-up companies essential information and insights into the latest products, research and intelligence from the industry.

Distribution and Supply

Elektor Industry appears synchronously in English and German and is supplied free to Elektor Magazine Gold members in print, and to Elektor Green members as a PDF download. The magazine is also distributed for free at select trade shows

including productronica (Munich), electronica (Munich), and Embedded World (Nuremberg).

Reader Notices

Elektor Industry in 2022

For 2022, we are planning 6 editions of *Elektor* magazine with special Elektor Industry sections covering a broad scope of electronics subjects:

- › January/February: Motor Control
- › March/April: Embedded Development (embedded world fair)
- › May/June: Test & Measurement
- › July/August: Wireless Applications
- › September/October: Internet of Things
- › November/December: Production and Components (electronica fair)

As always, background reports and features covering the latest product developments will come from companies, industry specialists, Elektor authors/editors, and freelance authors.

The 2022 Elektor Industry specials will be integrated in *Elektor* magazine, which also will include in-depth editorial articles covering the specified subjects and much more. In the January/February edition you will find an article about H-bridge circuitry, a background article about medium-sized e-motors and a servo tester project (subject to change).
