

60 Years of Electronics and Elektor (1961-2021)

Tubes, AI and Everything in Between

Sixty years of *Elektor* magazine! Join us as we review the past six decades of electronics innovation, from the tubes and ICs of the 1960s to the game-changing IoT solutions and AI chips of today. As we investigate the key electronics-related technologies of each decade, we highlight many of the exemplary projects, ideas, products, and inventions that came out of the Elektor community.

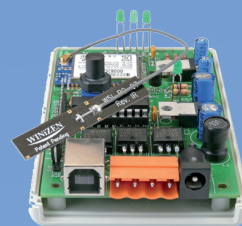

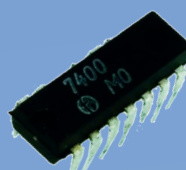

1961

The '60s: Tubes, Transistors and Beyond

The '00s: The Microcontroller Boom

The '70s: The Micro Movement

The '10s: The Internet of Things Explosion

The '80s: Home Computing and DIY Audio

The '90s: Digitization and the Internet

2021

+ Tubes to Transistors | The Intel 4004 | The Battle of 8-Bit Home Computers | The MCUs That Changed the Game | Arduino and Engineering in the 2000s | A Decade of Raspberry Pi And much more
